

# COVID GUIDELINES

## OPENING GUIDELINE

- Covid 19 is a very real but manageable situation, if you have any questions or suggestions about the guidelines listed below please don't hesitate to get in touch with a member of CHIMPOLATA.

## PCR TESTS

- PCR tests may be required, depending on client and location requirements.
- In addition to this, you may be required to provide full COVID-19 vaccination history, depending on client and location requirements.

## SOCIAL DISTANCING

- Occasionally a minimum 2-meter distance at all times may be required, under these circumstances it's important to minimise the time spent in closer proximity.
- If you're not sure of the distance, stand further away.

## FOOD AND DRINK

- Bring your own water bottle.

- Keep crew food and drink in a clearly designated area.

## PPE AND SANITISATION

- Production will supply hand sanitiser and face masks for crew members.
- Hands must be washed every hour.
- Face masks will need to be changed at least twice each working day and must be disposed of within a bin when changing them.
- Gloves are to be worn when touching anything belonging to the client and talent and disposed of afterwards.

## EQUIPMENT DISTANCING

- Only crew members of that department can touch filming equipment.
- Keep equipment bags and cases grouped in a designated place.
- Equipment is to be wiped down carefully with disinfecting materials at the end of each shoot.
